

SEBASTIAN TORRES

Boynton Beach, FL | (954) 304-7962 | sebas.t.nait@gmail.com | linkedin.com/in/sebastian-torres-cs

PROFESSIONAL SUMMARY

Early-career full-stack software developer who builds internal business applications, AI-powered tools, data workflows, and automations using Python, TypeScript, React, Next.js, and FastAPI. Experienced taking practical products from idea through deployment and applying SQL, Python, Tableau, and Excel to operational analysis and reporting.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript (ES6+), PHP, HTML5, CSS
Web & APIs: React, Next.js, Node.js, FastAPI, Flask, Tailwind CSS, REST, JWT/OAuth, WorkOS, Stripe API
Data & Cloud: MongoDB, PostgreSQL, Supabase, Prisma, MySQL, SQL Server, AWS, Azure, Vercel, Railway
AI & Delivery: Google Gemini API, GitHub Copilot, Cursor, Git, GitHub Actions, Docker
Data Analytics & ML: Pandas, NumPy, R, Tableau, Excel, Matplotlib, scikit-learn, Keras, PyTorch

PROFESSIONAL EXPERIENCE

Full Stack Python Developer | MST Jan 2026

Delray Beach, FL

- Designed and maintained the production Supabase/PostgreSQL schema powering core workflows for a sports platform deployed through AWS Amplify.
- Built Python services on Railway to collect, normalize, and automate ingestion from multiple sports APIs.
- Contributed to a backend restructure that replaced MongoDB-dependent workflows with Supabase services and relational data models.

Front-End UI/UX Prototyping Intern | Local Fiber Aug 2025-Feb 2026

Remote

- Built an ISP onboarding platform using PostgreSQL, Redis, and Stripe for customer enrollment and plan management.
- Designed a multi-location service-area assignment system spanning local market, city, county, state, and country plan regions.
- Implemented onboarding UI and routing with AI-assisted development, integrating service eligibility and subscription workflows.

IT & Programming Intern, Division of Student Affairs | Florida Atlantic University Jun 2024-Jan 2026

Boca Raton, FL

- Designed a Microsoft SQL Server-backed student reservation system enforcing eligibility, building-specific inventory rules, and role-based access.
- Added administrative analytics, charts, and multi-format exports for reservation monitoring and reporting.
- Replaced paper-based tracking across multiple residence halls and adapted a second version for a branch-campus student union facility.

PROJECT IN DEVELOPMENT

Inventory Management Dashboard | Personal | In Development

- Developing a full-stack inventory dashboard with role-based workflows, operational reporting, and secure inventory management.
- Connected the Gemini API to support AI-assisted inventory recommendations and management workflows.
- Implementing React and TypeScript interfaces, Prisma/PostgreSQL data models, secure CRUD operations, and JWT authentication.

EDUCATION

Florida Atlantic University May 2026

B.A. in Computer Science | Minor: Artificial Intelligence and Cyber Security | GPA: 3.85 | Boca Raton, FL

Relevant Coursework: Data Analytics; Data Mining & Machine Learning; Deep Learning; Introduction to Artificial Intelligence

CERTIFICATIONS & RECOGNITION

Career Essentials in Software Development - Microsoft & LinkedIn Aug 2024

Python (Basic) Certification - HackerRank Jul 2024

President's Honor List - Fall 2023-2025
